Full Stack Web Developer with a life-long dedication to learning. Demonstrated leadership with a clear understanding of the five stages of web development to create fully functional websites and web applications. Equipped with the knowledge and expertise to collaboratively with a like-minded team to ensure optimal results for user-centered and technology-centered designs.

Technical Skills

Languages: HTML5, CSS3, JavaScript, jQuery, Bootstrap, React.js

EXPERIENCE

Tusk Official LLC   11/2016 – Present
Web Developer   Saint Paul, MN

As a Front-End Developer on Tusk official's Team, I use solid software development practices to build data driven web applications & help meet business requirements

- Developed and maintained an internal application that allows admin to assign camp goers to cabins
- Developed front end design using bootstrap and further edited using HTML and CSS
- Application was built with vanilla JavaScript and using node.js for versatility
- MySQL was the database used to store user data and control Authentication
- jQuery was used for server-side DOM manipulation
- Built and designed front end static webpages as well as multi-page websites using HTML and CSS
- Utilized JavaScript and jQuery to build e-commerce pages with shopping cart capabilities and
- admin portals

EDUCATION
